*Since Procter & Gamble was founded, over 175 years ago, ensuring the safety of people who use our products, and the safety of the world we all live in, has been at the heart of what we do. This commitment to safety is both our heritage and our future, so we have over 700 in-house experts devoted globally to the environmental safety, human safety and regulatory compliance of all our products and ingredients. P&G's products and ingredients are evaluated by our safety scientists to provide assurance that the consumer's use of the product is safe. In this process, we take into account Procter & Gamble's stringent internal safety standards, as well as the safety standards set by the US Food and Drug Administration, Health Canada, and regulatory and scientific authorities globally.*

This list will be regularly updated to reflect changes in the formula.
